

JINANDRA KUMAR

AI-Augmented Backend Engineer | Python, Laravel, FastAPI | APIs, SaaS & System Modernization

Greater Noida, India | +91-9953578272 | jinandra.gupta@gmail.com | linkedin.com/in/jinandra-gupta-49306122

GitHub/Portfolio: jinandra.github.io | Upwork: upwork.com/freelancers/jgupta

PROFESSIONAL SUMMARY

Backend and full-stack engineer with 12+ years of software development experience across PHP and Python ecosystems, including 8+ years as a full-time freelancer building scalable APIs, SaaS platforms, e-commerce systems, OTT products, booking workflows, and AI-integrated applications. Strong background in Laravel, Symfony, FastAPI, Django, Vue, React, AWS, Redis, and production-grade system design. Known for modernizing legacy platforms, solving complex backend issues, and building reliable systems that perform under real-world load.

CORE COMPETENCIES

- Backend & API Development: Python (FastAPI, Django), PHP, Laravel, Symfony, CakePHP, CodeIgniter, Yii, Core PHP
- Frontend & Product Delivery: Vue.js, React, Next.js, Tailwind CSS, Livewire, JavaScript, TypeScript
- Data & Infrastructure: MySQL, PostgreSQL, MongoDB, MS SQL Server, SQLite, Redis, AWS (EC2, S3, SES, RDS, CloudFront), CI/CD, Linux
- Specialties: SaaS architecture, legacy modernization, payment integrations, automation workflows, AI integrations, performance optimization, team leadership

PROFESSIONAL EXPERIENCE

Freelance Full Stack / Backend Engineer | Upwork

Remote / Noida | Jun 2016 - Present

- Built and maintained CRM, SaaS, e-commerce, loyalty, OTT, online booking, and custom business platforms for international clients.
- Designed scalable APIs, backend workflows, and admin systems using Laravel, Python, MySQL, Redis, Vue.js, and Node.js.
- Delivered production systems on AWS using RDS, S3, CloudFront, EC2, Redis, and load-balanced environments.
- Supported platforms serving 100K+ real-time users and led modernization initiatives from PHP-based stacks toward Python-based services.
- Helped clients build engineering teams from scratch, scaling delivery teams up to 20 members and improving execution processes.

Associate Tech Lead | Affle (India) Ltd.

Noida | Jun 2013 - Jun 2016

- Worked on smart TV and OTT products for major media and telecom clients including Time Warner Cable, Charter, Cisco, and Comcast.
- Contributed to hosted navigation and video-on-demand solutions, including applications for Amazon Fire TV.
- Built internal monitoring and activity-tracking web applications using PHP and MySQL.
- Delivered prototypes and product features across OTT, set-top box, and digital media initiatives.

Senior Web Developer | Jingle Infotech Ltd.

New Delhi | Jul 2011 - Jun 2013

- Worked on Fitho's online diet management platform from the ground up, contributing to product delivery and system implementation.

Software Engineer | Ebizon NetInfo

Noida | Aug 2010 - Jun 2011

- Developed Drupal themes and custom modules for projects such as amarchitrakatha.com, spilgames.com, and globalgrind.com.
- Transitioned from digital marketing into development and earned promotion based on top quarterly performance.

SELECTED PROJECTS

Vimery: Built a customer-retention and revenue-growth platform for small businesses using PHP, Laravel, MySQL, Vue.js, Redis, RDS, and Node.js.

SmashiTV: Contributed to a media platform in the Middle East using Laravel, MySQL, and Vue.js; supported product analytics to guide content strategy and regional growth.

Ladybug: Developed an online travel booking platform for flights, cars, and hotels using Symfony, Twig, MySQL, HTML, and CSS.

KATS: Worked on Kane Industries Advanced Telematic Software to streamline product configuration, quoting, project workflows, and customer data management.

EDUCATION

Master of Computer Applications (MCA) - Dr. A. P. J. Abdul Kalam Technical University, 2007 - 2010

Bachelor of Science (Mathematics) - Chaudhary Charan Singh University, 2003 - 2006

ADDITIONAL HIGHLIGHTS

- Experienced in Agile production environments, cross-functional collaboration, and remote delivery.
- Hands-on with payment gateways including Stripe, PayPal, EBS, and CC Avenue.
- Comfortable owning work from system design through delivery, deployment, and post-launch support.
