CORE SKILLS

- Python · FastAPI · Django
- PHP · Laravel · Symfony
- Vue.js · React · Next.js
- MySQL · PostgreSQL · MongoDB
- Redis · AWS · Docker · CI/CD
- REST APIs · Webhooks
- Stripe · PayPal · EBS
- JWT · OAuth2 · RBAC

AI & LLM TOOLS

- ChatGPT GPT-4o · Claude
- Gemini · GitHub Copilot
- LangChain · LlamaIndex
- Pinecone · pgvector · RAG
- ElevenLabs · HeyGen
- n8n · Make.com · Zapier AI

STRENGTHS

- LLM Integration & RAG
- SaaS Architecture
- Legacy Modernisation
- Performance Optimisation
- Full Lifecycle Delivery
- Remote Team Leadership

EDUCATION

MCA
AKTU University
2007 – 2010

B.Sc. Mathematics
CCS University
2003 – 2006

UPWORK STATS

- Top Rated · 97% JSS
- 5.0 ★ · 25 contracts

Years Exp.	Global Platforms	Job Success	Users Served

PROFESSIONAL SUMMARY

Senior Backend Engineer with 15+ years of experience delivering production-grade SaaS platforms, scalable APIs, and AI-powered applications for clients across the US, UK, Middle East, and Australia. Deep expertise in Python (FastAPI, Django) and PHP (Laravel, Symfony), with hands-on LLM integration experience — ChatGPT, Claude, Gemini — in real-world business workflows. Known for owning the full engineering lifecycle: architecture, development, AWS deployment, and post-launch support. Actively seeking a full-time remote Senior Backend Engineer role.

PROFESSIONAL EXPERIENCE

Senior Backend Engineer | Independent Consulting / Upwork

Jun 2016 – Present

📍 *Remote · Greater Noida, India*

- ▸ Architected and delivered 20+ production platforms — CRM, SaaS, OTT, e-commerce, and AI-powered apps — for clients across the US, UK, Middle East, and Australia.
- ▸ Integrated LLMs (ChatGPT GPT-4o, Claude, Gemini) into production workflows: AI chatbots, document Q&A, RAG pipelines, and automated content generation tools.
- ▸ Used ElevenLabs for voice synthesis and HeyGen for AI video avatars in client-facing media and marketing products.
- ▸ Leveraged GitHub Copilot and Claude daily for code generation, testing, and review — reducing delivery time by ~30%.
- ▸ Built and maintained AWS environments (EC2, RDS, S3, CloudFront, Redis) supporting 100K+ concurrent users with auto-scaling load-balanced infrastructure.
- ▸ Engineered multi-step LLM prompt chains and fine-tuned model outputs, improving AI accuracy and reducing hallucination rates across production apps.
- ▸ Cut API response times by up to 60% via query optimisation, Redis caching, and AWS load-balancing — significantly reducing infrastructure costs.
- ▸ Implemented OAuth2/JWT, RBAC, encrypted data handling, and GDPR-aligned policies for clients in healthcare, finance, and legal industries.
- ▸ Led legacy PHP-to-Python modernisation initiatives, enabling LLM and AI integration on existing enterprise platforms.
- ▸ Helped build and scale client engineering teams from scratch — growing teams to 20+ members with improved Agile/Scrum delivery cadence.

FREELANCE ENGAGEMENTS (2016 – PRESENT)

Senior Full Stack Dev / Project Lead | Digital Artflow · Europe

Feb 2022 – Mar 2026

📍 *Remote*

- ▸ Delivered SaaS configurators and enterprise platforms for KATS (Overhead Door Corp), Simplio3D, Smiths Interconnect Cable Configurator, and Wise/Deck Designer — full-stack (Laravel, Vue.js, React, MySQL, Redis) from architecture through deployment.

Project Lead Developer | MyLoyaltyApps · US

Mar 2019 – May 2026

📍 *Remote*

- ▸ Built Vimery, a SaaS loyalty CRM — subscription billing, rewards, Stripe payments, POS integrations, merchant dashboards, and OpenAI-powered content suggestions.

Lead Full Stack Developer | Augustus Media · UAE

Apr 2021 – May 2023

📍 *Remote*

- ▸ Led development of Smashi.tv — live OTT/streaming platform (WebRTC, AWS Lambda), VOD, subscriptions, real-time APIs, and content management for MENA market.

Head of Operations / Lead Developer | Ladybug.Com Inc · US

May 2019 – Feb 2023

📍 *Remote*

▸ Developed and operated Ladybug.com — travel meta-search (flights, hotels, cars), third-party API integrations, database optimisation, Google AdSense, and revenue analytics.

Senior Lead Software Engineer | Secugo · EU *Jul 2016 – Nov 2019*

📍 *Remote*

▸ Led full-stack development of Secugo — real-time security & emergency-response platform (PHP, Laravel, AngularJS, Node.js, WebSockets) with live incident alerts and Google Maps tracking.

Associate Tech Lead | Affle (India) Ltd. *Jun 2013 – Jun 2016*

📍 *Noida, India*

▸ Built smart TV / OTT products for Time Warner Cable, Charter, Cisco, and Comcast — including Amazon Fire TV applications and hosted navigation / video-on-demand platforms.

Senior Web Developer | Jingle Infotech Ltd. *Jul 2011 – Jun 2013*

📍 *New Delhi, India*

▸ Core contributor on Fitho's online diet management platform — product features and system implementation from the ground up.

Software Engineer | Flieger India *Aug 2010 – Jun 2011*

📍 *Noida, India*

▸ Built Drupal themes and modules for amarchitrakatha.com, spilgames.com, and globalgrind.com; promoted after transitioning from digital marketing into software development.

SELECTED PROJECTS

GrowDash · *growdash.ai · UK / Middle East*

Python/FastAPI backend powering an AI delivery manager that optimises restaurant performance across Uber Eats, Deliveroo & DoorDash. Clients include Prezzo and Pizza Pilgrims. Built real-time analytics pipelines and AI-driven menu performance recommendations.

SmashiTV · *smashi.tv · UAE / MENA*

OTT and sports media platform for the Middle East market. Laravel/Vue.js backend handling live content delivery, subscription billing, multilingual (EN/AR) support, and product usage analytics for a fast-growing streaming audience.

SMS-Magic · *sms-magic.com · US*

Python backend services for a Salesforce and Zoho CRM-integrated business messaging SaaS. Engineered high-throughput messaging pipelines, webhook handlers, and campaign automation serving enterprise marketing and customer support teams.

Medtrics · *medtricslab.com · US*

Python/Django backend for a clinical education SaaS used by US medical schools and residency programs. Delivered scheduling automation, workflow management, compliance tracking, and reporting dashboards for program directors.

Vimery · *vimery.com · US*

Laravel/Python full-stack loyalty CRM SaaS with subscription billing, reputation management, and AI-driven content suggestions via OpenAI API. Integrated Stripe for recurring billing and built multi-location business dashboards.

Flowmatic · *flowmatic.ai · Netherlands*

FastAPI backend enabling autonomous multi-agent AI orchestration for enterprise workflows. Built agent routing logic, task queuing, and LLM integration layers for customer service automation and facility management use cases.

KATS · ClientOnline · Blue Peak · LadyBug · *US · Australia · UK*

Enterprise GPS/telematics platform (KATS, US), Australian securities registry client portal (ClientOnline), UK accounting automation tool (Blue Peak), and an 8-year global travel booking platform (LadyBug, Symfony + GDS API integrations).

Simplio3D · *simplio3d.com · US*

Python APIs for an interactive 3D product configurator SaaS — real-time rendering configuration, material/colour selection engine, and e-commerce platform integrations for furniture and home décor brands.

ADDITIONAL HIGHLIGHTS

▸ Top Rated on Upwork · 97% Job Success Score · 5.0 ★ rating across 25 contracts · 4,400+ hours billed

▸ Payments expertise: Stripe, PayPal, EBS, CC Avenue — subscription billing and one-time payment flows

▸ Fluent in Agile/Scrum · async remote delivery · cross-timezone collaboration (US, UK, UAE, AU)

▸ Active learner — continuously integrating new LLM frameworks and AI tools into every production project
